Action 4: Monitoring of 260 farms in Europe and construction of carbon plans

168 meat farms

1-Initial assessment

 Assessment of carbon footprint, but also environmental and sustainability performances

2-Carbon action plan

 Identification of mitigation practices, construction of an action plan and assessment of its impact (theorical)

3-Implementation

Implementation of mitigation practices

4-Final assessment

 Assessment of GHG emission reductions over 3 years, and other environmental and economic impacts
